

## Obama Hits the Gas, Prices Accelerate in Arizona

I have supported legislation to promote an “all of the above” energy solution to ease the pain at the pump.

### Advocating for Increased American Oil and Gas Production:

**Putting the Gulf of Mexico Back to Work Act -H.R. 1229:** Expands domestic oil and gas production in a safe, responsible, and transparent manner by setting firm time-lines for permits.

- ✓ Passed the House of Representatives on May 11, 2011 – Stalled in the Senate

### Protecting Investment in Oil Shale the Next Generation of Environmental, Energy, and Resource Security (PIONEERS) Act - H.R. 3408:

This legislation expands offshore energy production, opens less than three percent of ANWR for oil and natural gas production, encourages the development of oil shale, and approves the Keystone XL pipeline.

- ✓ Passed the House of Representatives on February 16<sup>th</sup>, 2012 – Stalled in the U.S. Senate

### Fighting to Decrease Domestic Oil and Gas Demand by Expanding Renewable Energy Production

#### Cutting Red Tape to Facilitate Renewable Energy Act - H.R. 2170:

The bill makes common sense regulatory reforms to accelerate the development of clean, renewable energy projects that create jobs and protect the environment.

- ✓ Passed the House Natural Resources Committee on November 19<sup>th</sup>, 2011 – Awaits Action on the House Floor.

#### Bureau of Reclamation Small Conduit Hydropower Development and Rural Jobs Act of 2012 -H.R. 2842:

This act spurs rural economic development and increases production of clean, renewable hydropower by removing duplicative red tape that already doubles the cost of the hydropower facility and makes development cost-prohibitive.

- ✓ Passed the House of Representatives on March 7, 2012 – Stalled in the Senate

## Removing Regulatory Barriers that Increase Energy Costs

### **Transparency in Regulatory Analysis of Impacts on the Nation Act of 2011 - H.R. 2401:**

The bill forces federal agencies to conduct a comprehensive analysis of regulations before enactment to ensure they do not hamper economic growth and job creation.

- ✓ Passed the House of Representatives on September 23, 2011 – Stalled in the Senate

### **Energy Tax Prevention Act of 2011 – H.R. 910:**

This legislation prohibits the Environmental Protection Agency from creating high cost, low environmental benefit rules on greenhouse gas emissions.

- ✓ Passed the House of Representatives on April 7, 2011 – Stalled in the Senate
- 

*Whether Congressman Gosar is in Washington D.C. fighting for his constituents, or back home in Arizona listening to the people and working together to find solutions to the problems that face Arizona, he remains committed to ushering in a new era of government that empowers individuals and reforms the bureaucratic procedures that stifle job creation and innovation. As a dentist and small business owner for over 25 years, Congressman Gosar is focused on bringing jobs back to Arizona, reforming health care, reining in government spending, and ensuring that the American people are involved in the solution making process.*

As always, you can follow everything he is working on in Arizona and Washington, D.C. through his website (<http://gosar.house.gov>), or by following his actions through social media.
