

Fighting A Spending Addiction

Archived March 1

Dear Friend,

In the last month, we have been subjected to propaganda from the White House warning the American public that practically everything the federal government does will be shut down because of the impending 2.4% sequestration cuts.

President Obama has threatened the cuts will lead to: “long lines” at the airports, shutting down national parks and veterans centers, stopping vaccinations, increased deaths from AIDS, and sending pre-school children out in the streets closing their schools. The President all but said our military will overnight become second rate and the world could erupt in (even more) civil wars and chaos.

Let’s look at the facts: Even with \$85.4 billion in cuts, the federal government will spend over \$3.6 trillion this year.

This is an astronomical sum. If President Obama can’t run our federal government on \$3.6 trillion this year, I will gladly accept his immediate resignation on behalf of the American taxpayer. Read more of my op-ed

Standing Up For Mohave Residents

I introduced the Mohave County Radiation Compensation Act of 2013, H.R. 424, legislation intended to ensure that residents of Mohave County, who may have been exposed to radiation poisoning from nuclear weapons tests between 1952 and 1962, are compensated.

From the moment the Radiation Exposure Compensation Act was first passed, to when it was later amended, a portion of Mohave County was unjustifiably left out. This common-sense solution would make sure that everyone in the county who has seen his or her health deteriorate as a result of such radiation is rightfully recognized and paid.

Defending Arizona from our own Department of Homeland Security

It is downright irresponsible and borderline criminal the way President Obama and the DHS this week released illegal immigrants who knowingly violated our nation's laws.

Did the President just take a page out of Fidel Castro's playbook and release inmates from jails and onto the public?

This goes to show that the President's administration is willing to threaten central government functions like public safety in an attempt to achieve their political goals. Public safety is an essential function of government and the American people need not be held victim by the President. Read more [HERE](#).

Restoring Competition in Healthcare

This week, I introduced the Competitive Health Insurance Reform Act of 2013. As a practicing dentist for 25 years, I have experienced first-hand the difficulties patients face with their insurance companies.

My legislation would restore competition within the health insurance market and apply anti-trust laws to the industry. Amending the McCarran-Ferguson Act will benefit patients across the country with lower prices and more choices.

What's on your menu? Just got off the phone with my health care provider asking them to explain why my premium jumped up. No good answer!
