In Defense of Liberty

Dear Friend,

Yesterday, I introduced a Resolution of No Confidence in U.S. Attorney General Eric Holder. The resolution states "that it is the sense of the House of Representatives that Congress has lost confidence in the Attorney General of the United States and thereby **requests his immediate resignation.**"

I am very frustrated that it is even necessary for me to reintroduce this resolution. Attorney General Holder continues to evade his constitutional obligations to provide Congress and the American people answers for Operation Fast and Furious.

Regardless of the contempt charges which have already been passed by the House, Mr. Holder must immediately resign his post so the President may appoint a new Attorney General ó one who will hopefully restore confidence in our justice system. Read more [HERE](#).

Protecting the Second Amendment

On Wednesday, President Obama held a press conference outlining his overreaching and unconstitutional gun-restriction proposals. I took an oath to protect and defend the U.S Constitution. I will actively fight any attempt by this Administration to undermine our Constitution and infringe upon the Second Amendment rights of law-abiding citizens.

With the attack on personal gun-ownership, the Second Amendment, and our God-given rights, the Obama-Biden Administration has been relentless in their pursuit of taking guns away from law-abiding Americans. To read more click [HERE](#).

In case you missed it, I also wrote an op-ed on the Second Amendment [HERE](#).

EPA Regulations Will Raise Rates on Arizonans

The Navajo Generating Station and the Central Arizona Project have played an instrumental role in making Arizona the state it is today. I am disappointed that President Obama's EPA has put forth one of the most stringent emission mandates in the country just a week after promising a strategy that would balance the economic needs of Arizona and our environmental concerns.

These regulations are sure to increase water and electricity bills in our state while making, despite what the EPA says their science justifies, little to no visibility

improvements at the Grand Canyon.

There are still many unanswered questions about the specifics of the EPA proposal. As we move forward with the extensive review and public comment process, I encourage all Arizonans to come out to the many forthcoming public hearings and express their personal concerns about the EPA's plan.

Keeping Relief Spending for Relief

This week, the House of Representatives voted 241-180 to pass The Disaster Relief Appropriations Act (H.R. 152). I refused to vote for a bill stuffed with pork but sold as aid for the victims of Hurricane Sandy. We owe it to the taxpayers.

It seems the Democrats and their big-government allies continue to legislate by the mantra set forth by President Obama's Former Chief of Staff, Rahm Emanuel, who said, "Never let a crisis go to waste." These big spenders are intent on using this crisis to increase money on projects that have absolutely nothing to do with the damage Hurricane Sandy caused. Taxpayers and those in the affected areas need to know that recovery money is going toward recovery. Please click [HERE](#) or above to learn more.

Obamacare Malady of the Week:

A hospital in Pennsylvania will no longer deliver babies, because they are unable pay OB-GYNs due to cuts from Obamacare. Read more [HERE](#).
